OBJECTIVE

Am a skilled Mobile Developer who has around 3 years of experience with Mobile App development with Flutter and 4 years of experience with web development. If looking for a highly skilled and rich experienced mobile expert with a deep knowledge, a professional attitude, excellent communication skills and the highest code quality, then I'm the person you are looking for. Over the last 3 years I've built many apps of several fields for Android and Flutter apps. Principles As a freelancer, take great pride in making sure all of projects are up to client's satisfaction, all deadlines are met and quality assurance is carefully considered. Place customer satisfaction above all, and will bend over backwards to ensure customer satisfaction. In addition, promise to always deliver honest and speedy services.

- Frontend Developer from meta
- Backend Developer from meta
- React framework
- Php & Sql
- Laravel framework

EXPERIENCE

2022\4 -
2023\10

Cloud zone

Flutter Developer | Laravel Developer

Cloud zone is a company for software consulting , it is located in saudi Arabia I have worked at this company for year and a half and collected a lot of experience, I worked as a Flutter Developer and Laravel Developer, me and the professional team of the company were developing mobile apps with Flutter and make our own API with Laravel

2023\5 -
2023\8

Lordsbox

Flutter Developer | PHP Developer

I developed this application with Flutter and the backend with Laravel

The application is designed for a transport company in Germany and its function is:

- It monitors employees on a map so that the employer knows where his employees are, moment by moment
- It counts how many hours the employee works each day

Application features:

- Supported in Arabic and English
- The user can turn off his phone or log in to social media applications and the application still counts working hours

There is a control panel for the admin to monitor his employees and add and remove employees

2022\3

Pharmacy

Flutter Developer

Implemented by the Flutter framework

Application idea:

It is an application to order medicines online to facilitate the purchase process

This product has two versions

1 - User copy:

To provide the possibility of requesting medicines, communicating with the dealer, and determining the amount of medicines needed

2 - Admin copy

To provide the ability to manage medicines prices, delete them, and manage user's orders

App features:

- MVC architecture
- GETX Echo System
- Clean reusable code

Cabels

Flutter Developer

Implemented by the Flutter framework

Application idea:

It is an application designed to assist telephone exchange workers in Syria with the process of saving all customers' data, including name, phone number, and other important information, all of which are stored locally in the device's memory.

Application sections:

- Interface showing, modifying and deleting customer information
- Wireless customer data transfer interface (via a local network)
- Settings interface, the user can modify the color theme, send the local database through social networking applications, and import and export the database

features :

- Simple interface easy to use
- The possibility of sharing the database with another device wirelessly with ease
- MVC architecture
- GETX Echo System
- Clean, reusable code

VOLUNTEER WORKS

• X-POSITRON

I worked in this non-profit company as a volunteer in 2019. X-POSITRON is a company that helps develop rising software projects and provides them with support without any compensation, I contributed to the development of this company by creating an application and website for this company and helping many rising projects to grow

PROJECTS

- **X_O game (Flutter)**

The first project using Flutter since 2020, which is a simple tic tac toe game, its advantages:

- You can play against a computer or a human
- There are 3 levels of difficulty
- There is a calculation system for winning and losing
- You can completely change the colors of the game
- There is a simple login system

Github Link : https://github.com/MOUSAHLP/X_O-Game_Flutter

- **Interpolation (Flutter)**

A project using Flutter , My professor at the university asked me to create this app to help us understand his subject

It calculates the interpolation of any function according to the Newton - Gregory method

We give the application several points and it calculates the interpolation and draws the function
