- Decision making
- Team building

Certificates

- Flutter & Dart
- Frontend
- Php & sql

Experience

X-POSITRON (web)
2019\2 - 2019\3
Web development
Link :
https://xpositron.000webhostapp.com/index.php
This site talks about my branch of the college and
explains all its materials and provides links to download
and it is responsive to all screen sizes
 In the following languages:
 Html , Css , Javascript , Php , SQL
 I have linked it to a database through the free hosting
provided by the webhost site

X-POSITRON (Flutter)
2021\2 - 2021\3
Flutter Developer
I programmed this application for Android , the idea of it is that it talks about my branch in the
college and explains all its subjects and provides links to download files of my college

 Programmed with FLUTTER & DART for Front-end
 And for back-end I used Php & SQL

Cabels
2022\10 - 2022\11
Flutter Developer
Implemented by the Flutter framework
 Application idea:
 It is an application designed to assist telephone exchange workers in Syria with the process of
saving all customers' data, including name, phone number, and other important information, all of
which are stored locally in the device's memory.
 Application sections:
  - Interface showing, modifying and deleting customer information
  - Wireless customer data transfer interface (via a local network)
  - Settings interface, the user can modify the color theme, send the local database through social
networking applications, and import and export the database
 features :
  - Simple interface easy to use
  - The possibility of sharing the database with another device wirelessly with ease
 MVC architecture
  - GETX Echo System
 Clean, reusable code

Rada

2023\1 - 2023\1
Web Developer
Project using HTML, CSS, Javascript
It is for a cleaning company in Germany
And it offers :
• show the advantages of working with the company
• show the company's services
• Enabling the possibility of communication to request the service
Review Link : https://issa-al-halabi.github.io/Rada-Cleaning/

Pharmacy

2023\3 - 2023\4
Flutter Developer
Implemented by the Flutter framework
Application idea:
It is an application to order medicines online to facilitate the purchase process

This product has two versions
1 - User copy:
    To provide the possibility of requesting medicines, communicating with the dealer, and determining the amount of medicines needed

2 - Admin copy
To provide the ability to manage medicines prices, delete them, and manage user's orders

App features:
 - MVC architecture
 - GETX Echo System
 - Clean reusable code

Projects

X_O game (Flutter)

The first project using Flutter since 2020, which is a simple tic tac toe game, its advantages:
• You can play against a computer or a human
• There are 3 levels of difficulty
• There is a calculation system for winning and losing
• You can completely change the colors of the game
• There is a simple login system
Github Link : https://github.com/Issa-Al-Halabi/X_O-Game_Flutter

Interpolation (Flutter)

A project using Flutter , My professor at the university asked me to create this app to help us understand his subject

It calculates the interpolation of any function according to the Newton - Gregory method

We give the application several points and it calculates the interpolation and draws the function
Github link : https://github.com/Issa-Al-Halabi/interpolation
